

Branching Out: How Trees Are Part of Our World

By Joan Marie Galat

Owlkids Books. Hardcover. Book Condition: New. Wendy Ding (illustrator). Hardcover. 64 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. Trees have been around for nearly 400 million years, and today about 25, 000 species of trees have been identified. We've relied on trees for everything from fuel, food, and medicine to building houses and railways. Today, trees still touch our lives in countless ways. But what do we really know about them? *Branching Out* takes an in-depth look at these incredible plants, introducing the basics of tree biology and profiling 11 different trees from around the world, including familiar ones such as the Red Maple and lesser-known trees like the Tall-Stilted Mangrove. Showcasing the inextricable ways in which trees are part of our society, culture, and economy, this illustrated volume also outlines how animals need trees and how, sometimes, they even help trees survive through symbiosis. Full of useful facts and with a section on conservation, *Branching Out* is an essential primer that will leave young readers wanting to treat trees as well as they have treated us.
