Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The project was undertaken following the variability of rainfall and recurrent droughts in the country that affects the lives of millions of people whose livelihood is mainly dependent on agriculture. The project is of much importance as it is aimed at showing areas that are climatologically suitable for particular crops and also as a guide to the work of planners and farmers. The goal of this study is to extrapolate empirical research findings from the map for agri-environmental experimental design and as a framework for assessment of the impact of climate change on agriculture.
